

U.S. Commercial Service, American Embassy in Mexico City

U.S.-Mexico Smart Grid Technology & Business Forum 2013

Join us in Mexico City for the second annual U.S.-Mexico Smart Grid Technology & Business Conference, a high-level business development event designed to promote American smart grid technologies in Mexico and connect U.S. firms to business opportunities and key contacts.

As a technology panelist you will learn about the new government's plans for smart grid deployment in one of the world's most promising emerging smart grid markets and have the opportunity to engage Mexico's national utility senior leadership.

- Showcase your technologies in front of Mexico's smart grid business community as a conference panelist.
- Learn first-hand from Mexico's decision makers and thought leaders about the country's emerging smart grid market.
- Meet face-to-face with key buyers, policy makers, regulators, and industry leaders at the conference and during more intimate networking events.
- Discover Mexico's emerging smart grid ecosystem!
